# INCLUDED HARDWARE

8x

.257" ID X .500" OD X .375"  
Nylon Spacer

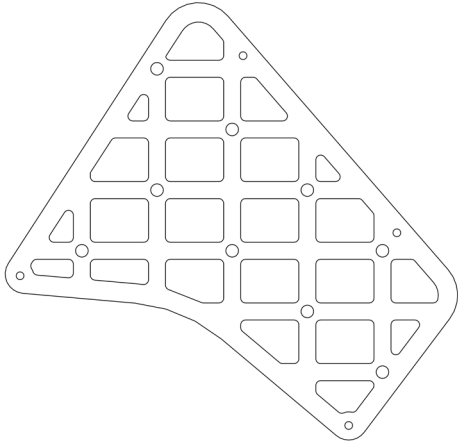

8x

8-15 X 3/4" PAN PHIL  
Button Head

# INCLUDED PARTS

2x

# ASSEMBLY

- 1** Start by placing the panel against the door in the large flat space above the cup holder. Line it up so that the edges of the panel are parallel to the lines in the door and there is an even space around the edges. Then, use a sharp, pointed tool such as an awl to mark the door through each of the small mounting holes in the edge of the panel.

- 2** Once all the holes are marked, set the panel down and make a hole in the door plastic at each of the marks. This can be done using a 1/16" drill bit, or we have had luck simply pushing the sharp punch tool through the plastic. Whatever you decide to do, be careful not to make the holes too big or too deep. Going too deep could potentially lead to you hitting something important within the door such as wiring.

# ASSEMBLY

- 3 Finally, install the panel into the door using the provided screws with a spacer between the panel and the door at each hole.
